# Health in Clarksville: Overview

Dear Community Members & Stakeholders of Clarksville,

We are pleased to share the Iowa Community Health Snapshot series, a set of reports designed in partnership with Iowa State University’s Community Economic Development to assess the overall landscape of health and well-being across Iowa. The following pages include the health snapshot for your community. The snapshot can be used to see how Clarksville ranks across various health measures compared to the rest of the state and similarly-sized communities. This comparison allows us to identify Clarksville’s strengths and opportunities for growth by leveraging the Centers for Disease Control and Prevention PLACES dataset.

The report includes 37 health measures organized topically by general health status, risky behavior, health outcomes, prevention, and disability. We provide a general overview of each health topic, followed by a description of each health measure. Health measure descriptions include crude and age-adjusted rates and a ranking that tells you how your community ranks compared to all Iowa communities and communities of similar size to Clarksville. Crude rates tell you the raw, un-adjusted percent of the population experiencing the health measure. Age-adjusted rates account for the age distribution present in your community and presents what the rate would be if your community had a standard age distribution. Crude rates can provide a general comparison between communities and age-adjusted rates can give a fairer comparison between communities with different age structures.

## Strengths

Take a look at the top strengths of your community! Below are unadjusted and age-adjusted health measures that represent your community’s strengths. We recommend using continued investment in these areas to maintain them as strengths, as well as building on them to improve in other health domains.

Crude			Age-Adjusted		
Health Domain	Statewide Community Rank	Small Community Rank	Health Domain	Statewide Community Rank	Small Community Rank
Binge Drinking	323rd	58th	Cancer (except skin)	74th	4th
Dental Visit	334th	62nd	Core preventive services for older women	221st	47th
Sleep <7 hours	374th	66th	Binge Drinking	249th	38th
Current Asthma	405th	63rd	Dental Visit	315th	61st
Taking BP Medication	420th	72nd	Chronic Kidney Disease	349th	65th

# Opportunities

Below are health measures that represent potential areas for growth in your community. We recommend increasing investment in these areas to support community health and well-being.

Crude			Age-Adjusted		
Health Domain	Statewide Community Rank	Small Community Rank	Health Domain	Statewide Community Rank	Small Community Rank
Mammography	764th	110th	Obesity	743rd	119th
All Teeth Lost	678th	101st	Colorectal Cancer Screening	729th	122nd
Obesity	675th	111th	Mammography	714th	113th
Any Disability	657th	90th	Physical Inactivity	612th	102nd
Hearing Disability	645th	79th	Any Disability	607th	95th

Please review the rest of the report to learn more about your community and reach out to us with questions about the report or for recommendations to improve the overall health and well-being in Clarksville.

Sincerely,

## How to Use this Report

The purpose of the Iowa Community Health Snapshot Series is to provide an overview of health in Clarksville that can be used to help inform health-related interventions and programming. This report contains five sections, including the overall health status of Clarksville, a review of risky behaviors in the community, and information on various health outcomes, prevention measures, and disability needs. Each section includes an overview of the health domain, a breakdown of its underlying health measures, and data to see how Clarksville compares to the rest of the state and similarly-sized communities.

With a population of 1,311, Clarksville's similarly sized communities are defined as small communities. In Iowa, small communities have an average population of 1,553, and there are 138 communities that are considered small communities. To see all of the communities in this population group, please see Appendix 3 of this report.

Group	Population Range	Number of Communities
Large	50,000+	11
Mid-Large	10,000-49,999	31
Midsized	2,500-9,999	102
Small	1,000-2,499	138
Very Small	0-999	676
Total		958

Using Ames, IA as an Example

The graphic below is an example of the details included for each health measure. The table in the upper right shows your community’s crude and age-adjusted rate estimates alongside their averages across all Iowa communities and similarly-sized communities. The images below show the distribution of the health measure across communities. The vertical lines correspond with the values in the table to show the estimate for the specific community compared to communities across the state. The solid black line in each plot represents the community rate, with the dashed lines indicating the average rate for all Iowa communities and the dotted lines showing the average rate for similarly-sized communities.

# Health Status

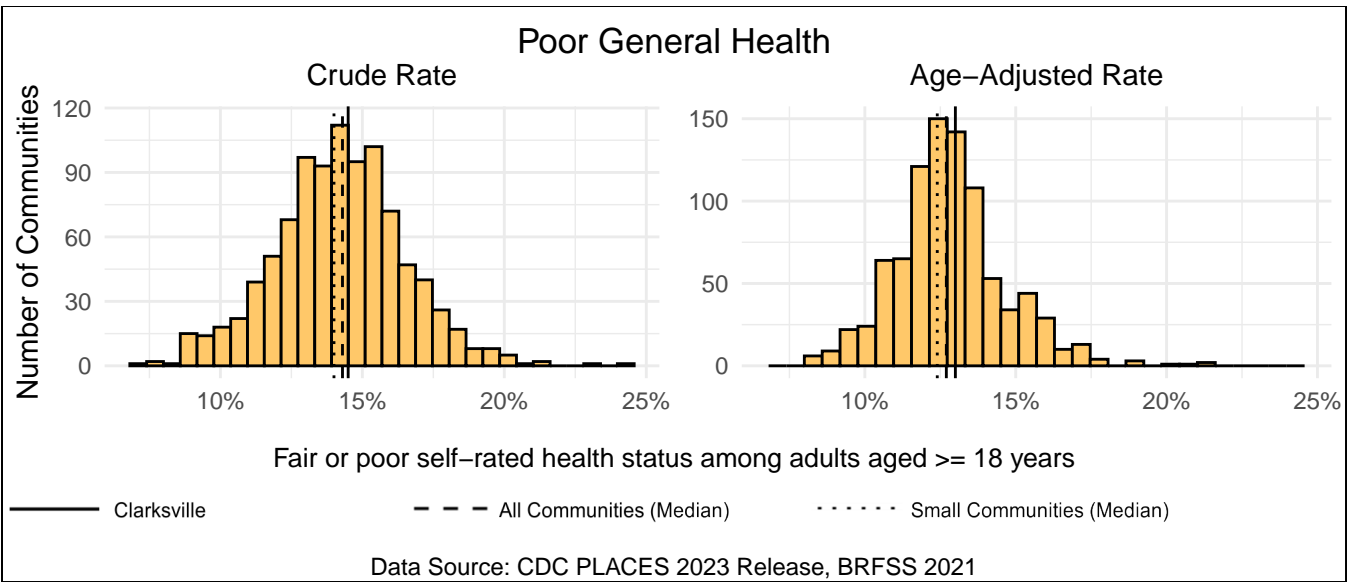

This section reflects measures for overall health, including general, physical, and mental health. These measures are a valuable way to see a simple summary of the health of a country’s population. The questions to calculate these measures ask respondents to evaluate their health status. General health is evaluated on a 5-point scale where respondents can report their health status as one of “excellent,” “very good,” “good,” “fair,” or “poor,” from which the respondents who answer “fair” or “poor” are included in the measure. Physical and mental health are evaluated as the rate of respondents who say they have had 14 or more days in the last 30 days in which their physical or mental health was not good. The URL below includes more information about each variable.

<https://www.cdc.gov/places/measure-definitions/health-status/index.html>

## Poor General Health

Clarksville has a crude rate of 14.5% for fair or poor self-rated health status among adults aged >= 18 years, which ranks 513th out of 958 Iowa communities (80th out of 138 small communities). The age-adjusted rate for Clarksville is 13.0%, which ranks 505th out of 905 Iowa communities (83rd out of 138 small communities).

Measure Type	Clarksville	All Comm.	Small Comm.
Crude	14.5%	14.3%	14.0%
Age-Adjusted	13.0%	12.7%	12.4%

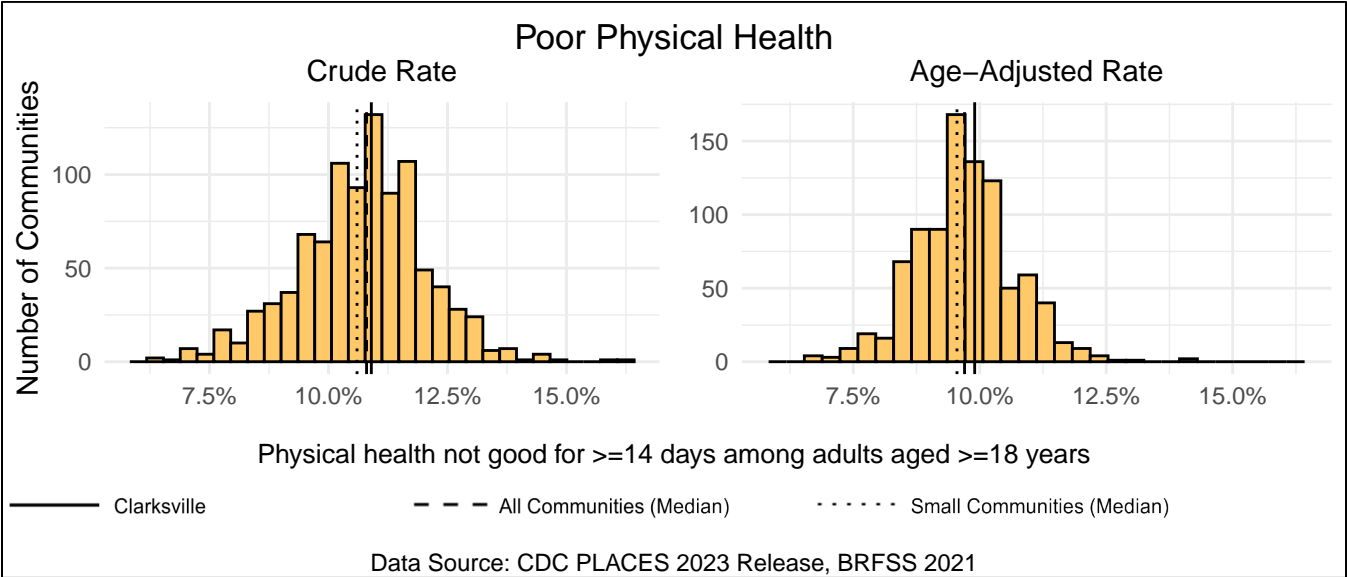

## Poor Physical Health

Clarksville has a crude rate of 10.9% for physical health not good for  $\geq 14$  days among adults aged  $\geq 18$  years, which ranks 493rd out of 958 Iowa communities (79th out of 138 small communities). The age-adjusted rate for Clarksville is 9.9%, which ranks 518th out of 905 Iowa communities (86th out of 138 small communities).

Crude	14.6%	14.3%	14.1%
Age-Adjusted	15.9%	15.5%	15.6%

# Health Risk Behaviors

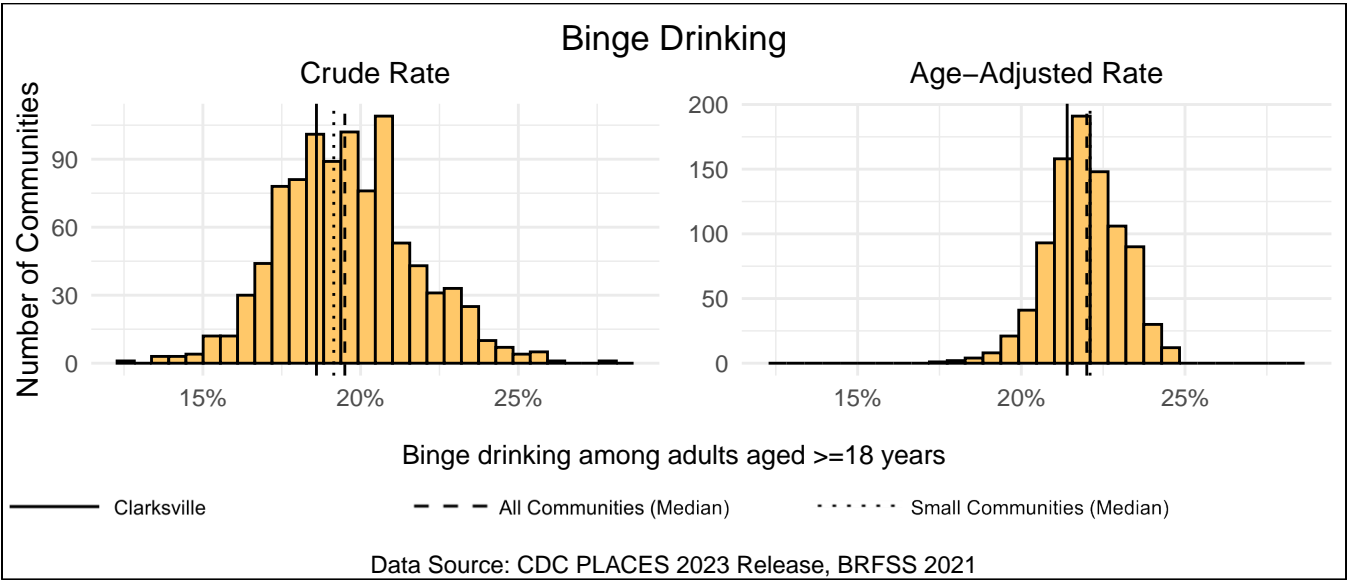

Health risk measures are measures of individual behaviors that can lead to poor health outcomes. These include binge drinking, current smoking, physical inactivity, and getting less than seven hours of nightly sleep. Risk behaviors are the most critical intervention points as they can help save lives and drastically improve health outcomes later in life. Each measure is calculated as the rate of respondents participating in a high level of risk behavior. The exact cutoff points for the behavior depend on the health area. The link below includes more information about each variable.

<https://www.cdc.gov/places/measure-definitions/unhealthy-behaviors/index.html>

## Binge Drinking

Clarksville has a crude rate of 18.6% for binge drinking among adults aged  $\geq 18$  years, which ranks 323rd out of 958 Iowa communities (58th out of 138 small communities). The age-adjusted rate for Clarksville is 21.4%, which ranks 249th out of 905 Iowa communities (38th out of 138 small communities).

Age-Adjusted	25.3%	24.3%	23.9%

Sleep <7 hours

Clarksville has a crude rate of 29.9% for sleeping less than 7 hours among adults aged >=18 years, which ranks 374th out of 958 Iowa communities (66th out of 138 small communities). The age-adjusted rate for Clarksville is 31.0%, which ranks 417th out of 905 Iowa communities (70th out of 138 small communities).

Measure Type	Clarksville	All Comm.	Small Comm.
Crude	29.9%	30.2%	29.9%
Age-Adjusted	31.0%	31.1%	31.0%

# Health Outcomes

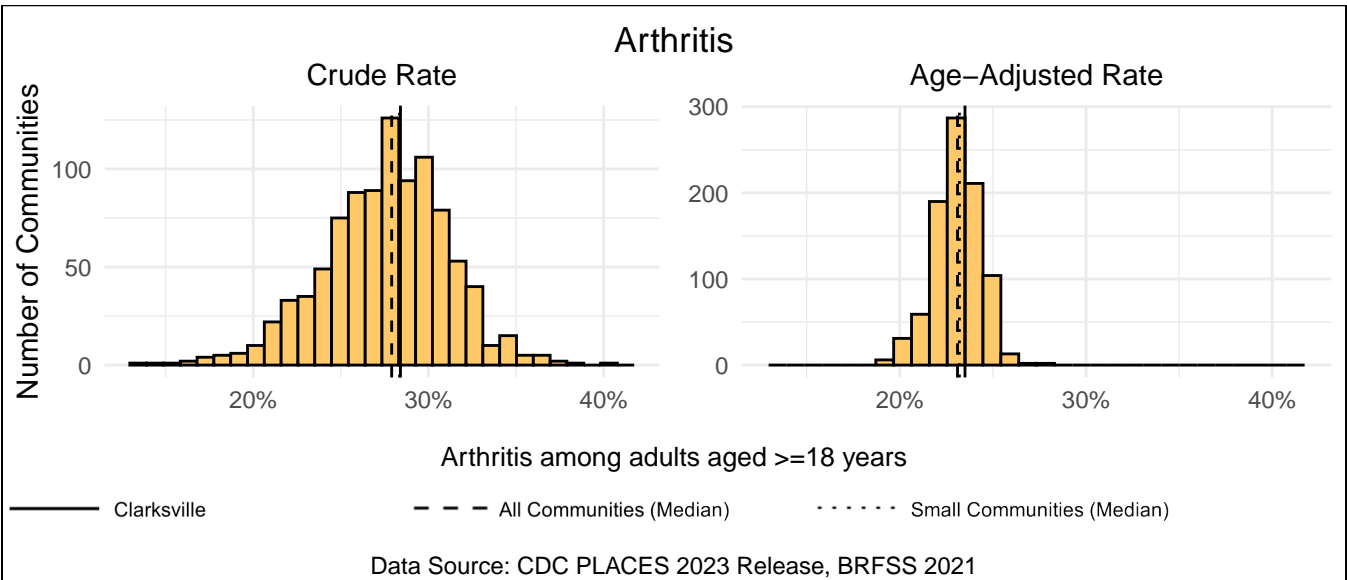

This section includes measures about specific health outcomes such as chronic illness, mental health conditions, and risk factors for future disease. Health outcome measures include but are not limited to arthritis, high blood pressure, cancer, depression, and obesity. Each measure is the percentage of respondents reporting receiving the diagnosis by a doctor, nurse, or other health professional. The link below includes more information about each variable.

<https://www.cdc.gov/places/measure-definitions/health-outcomes/index.html>

## Arthritis

Clarksville has a crude rate of 28.4% for arthritis among adults aged  $\geq 18$  years, which ranks 548th out of 958 Iowa communities (70th out of 138 small communities). ## Appendix 1: CDC PLACES Data

This report uses a novel dataset from the Centers for Disease Control and Prevention (CDC) called PLACES: Local Data for Better Health. The PLACES dataset uses small area estimation methods to provide estimates of health measures for counties, places, census tracts, and zip code tabulation areas. The estimates are created with a multilevel statistical modeling framework that utilizes CDC's Behavioral Risk Factor Surveillance System (BRFSS), Census population counts, and American Community Survey demographic and socioeconomic data.
