# Health in Le Claire: Overview

Dear Community Members & Stakeholders of Le Claire,

We are pleased to share the Iowa Community Health Snapshot series, a set of reports designed in partnership with Iowa State University’s Community Economic Development to assess the overall landscape of health and well-being across Iowa. The following pages include the health snapshot for your community. The snapshot can be used to see how Le Claire ranks across various health measures compared to the rest of the state and similarly-sized communities. This comparison allows us to identify Le Claire’s strengths and opportunities for growth by leveraging the Centers for Disease Control and Prevention PLACES dataset.

The report includes 37 health measures organized topically by general health status, risky behavior, health outcomes, prevention, and disability. We provide a general overview of each health topic, followed by a description of each health measure. Health measure descriptions include crude and age-adjusted rates and a ranking that tells you how your community ranks compared to all Iowa communities and communities of similar size to Le Claire. Crude rates tell you the raw, un-adjusted percent of the population experiencing the health measure. Age-adjusted rates account for the age distribution present in your community and presents what the rate would be if your community had a standard age distribution. Crude rates can provide a general comparison between communities and age-adjusted rates can give a fairer comparison between communities with different age structures.

## Strengths

Take a look at the top strengths of your community! Below are unadjusted and age-adjusted health measures that represent your community’s strengths. We recommend using continued investment in these areas to maintain them as strengths, as well as building on them to improve in other health domains.

Crude			Age-Adjusted		
Health Domain	Statewide Community Rank	Midsized Community Rank	Health Domain	Statewide Community Rank	Midsized Community Rank
Independent Living Disability	1st	1st	Chronic Kidney Disease	1st	1st
Mammography	1st	1st	Vision Disability	2nd	1st
Cognitive Disability	3rd	1st	Arthritis	2nd	1st
Any Disability	3rd	1st	Self-care Disability	2nd	1st
Core preventive services for older women	4th	1st	Mobility Disability	3rd	1st

# Opportunities

Below are health measures that represent potential areas for growth in your community. We recommend increasing investment in these areas to support community health and well-being.

Crude			Age-Adjusted		
Health Domain	Statewide Community Rank	Midsized Community Rank	Health Domain	Statewide Community Rank	Midsized Community Rank
Binge Drinking	869th	89th	Taking BP Medication	850th	94th
Taking BP Medication	855th	89th	Binge Drinking	811th	92nd
Annual Checkup	562nd	62nd	Cancer (except skin)	418th	41st
Core preventive services for older men	453rd	40th	Core preventive services for older men	332nd	37th
Sleep <7 hours	224th	30th	Annual Checkup	110th	15th

Please review the rest of the report to learn more about your community and reach out to us with questions about the report or for recommendations to improve the overall health and well-being in Le Claire.

Sincerely,

## How to Use this Report

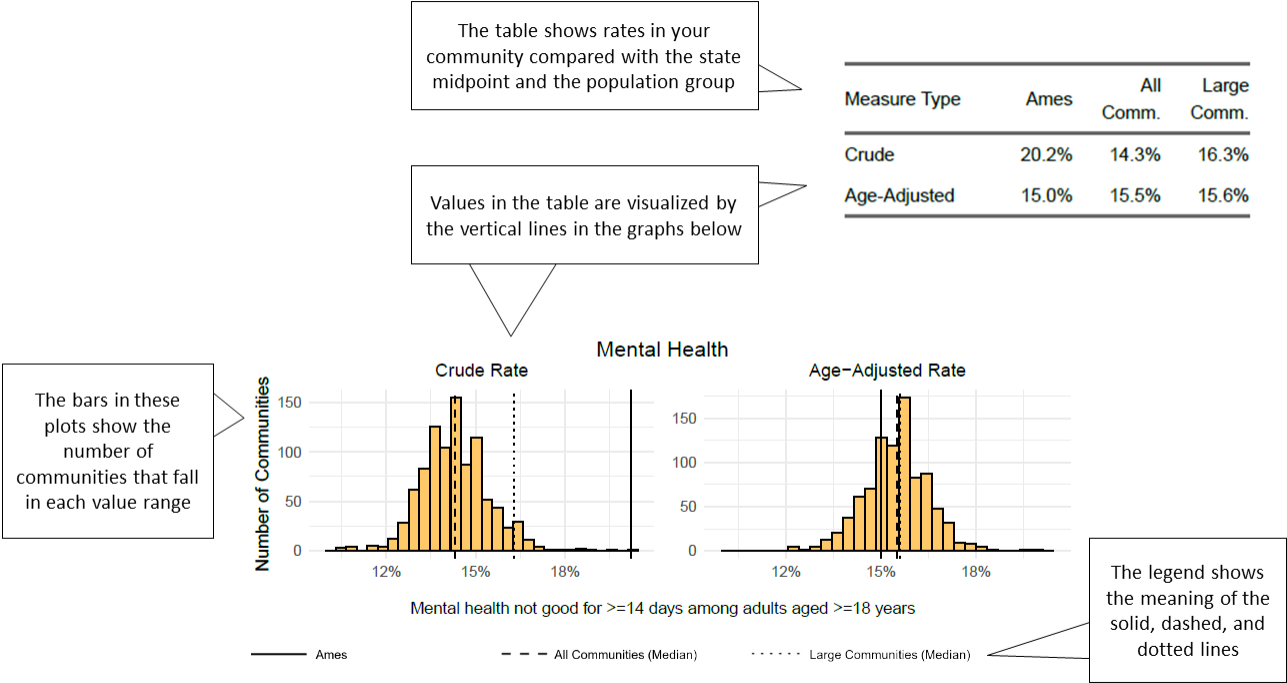

The purpose of the Iowa Community Health Snapshot Series is to provide an overview of health in Le Claire that can be used to help inform health-related interventions and programming. This report contains five sections, including the overall health status of Le Claire, a review of risky behaviors in the community, and information on various health outcomes, prevention measures, and disability needs. Each section includes an overview of the health domain, a breakdown of its underlying health measures, and data to see how Le Claire compares to the rest of the state and similarly-sized communities.

With a population of 4,679, Le Claire’s similarly sized communities are defined as midsized communities. In Iowa, midsized communities have an average population of 4,787, and there are 102 communities that are considered midsized communities. To see all of the communities in this population group, please see Appendix 3 of this report.

Group	Population Range	Number of Communities
Large	50,000+	11
Mid-Large	10,000-49,999	31
Midsized	2,500-9,999	102
Small	1,000-2,499	138
Very Small	0-999	676
Total		958

Using Ames, IA as an Example

The graphic below is an example of the details included for each health measure. The table in the upper right shows your community’s crude and age-adjusted rate estimates alongside their averages across all Iowa communities and similarly-sized communities. The images below show the distribution of the health measure across communities. The vertical lines correspond with the values in the table to show the estimate for the specific community compared to communities across the state. The solid black line in each plot represents the community rate, with the dashed lines indicating the average rate for all Iowa communities and the dotted lines showing the average rate for similarly-sized communities.

# Health Status

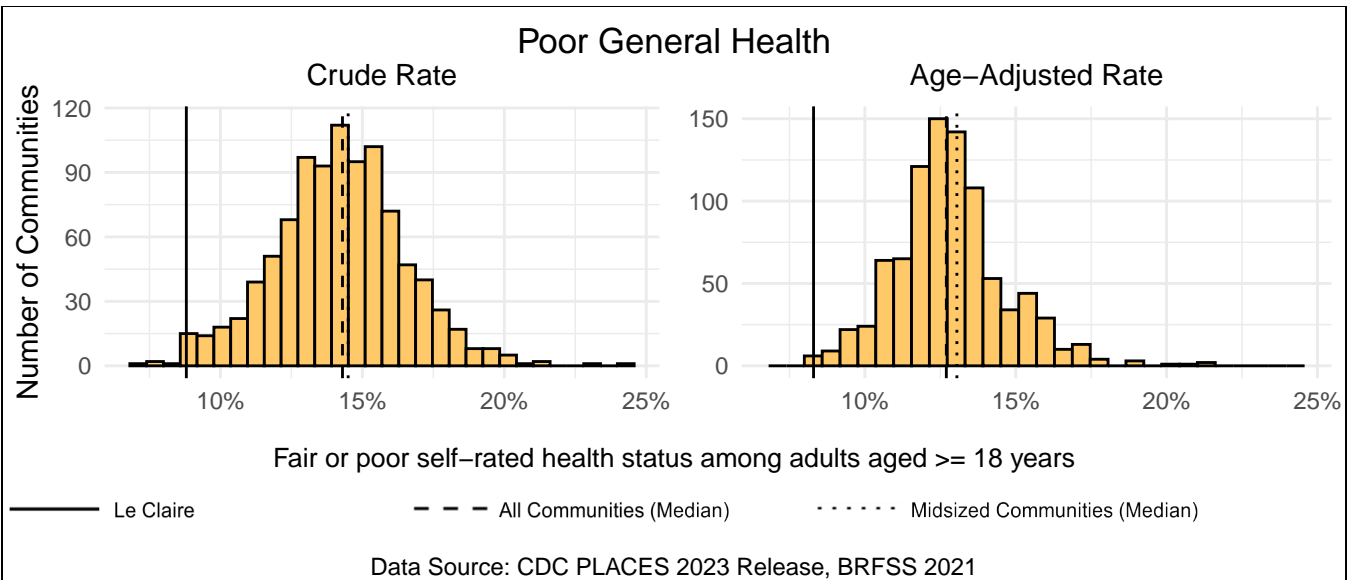

This section reflects measures for overall health, including general, physical, and mental health. These measures are a valuable way to see a simple summary of the health of a country’s population. The questions to calculate these measures ask respondents to evaluate their health status. General health is evaluated on a 5-point scale where respondents can report their health status as one of “excellent,” “very good,” “good,” “fair,” or “poor,” from which the respondents who answer “fair” or “poor” are included in the measure. Physical and mental health are evaluated as the rate of respondents who say they have had 14 or more days in the last 30 days in which their physical or mental health was not good. The URL below includes more information about each variable.

<https://www.cdc.gov/places/measure-definitions/health-status/index.html>

## Poor General Health

Le Claire has a crude rate of 8.8% for fair or poor self-rated health status among adults aged >= 18 years, which ranks 9th out of 958 Iowa communities (3rd out of 102 midsize communities). The age-adjusted rate for Le Claire is 8.3%, which ranks 4th out of 905 Iowa communities (1st out of 102 midsize communities).

Measure Type	Le Claire	All Comm.	Midsized Comm.
Crude	8.8%	14.3%	14.5%
Age-Adjusted	8.3%	12.7%	13.0%

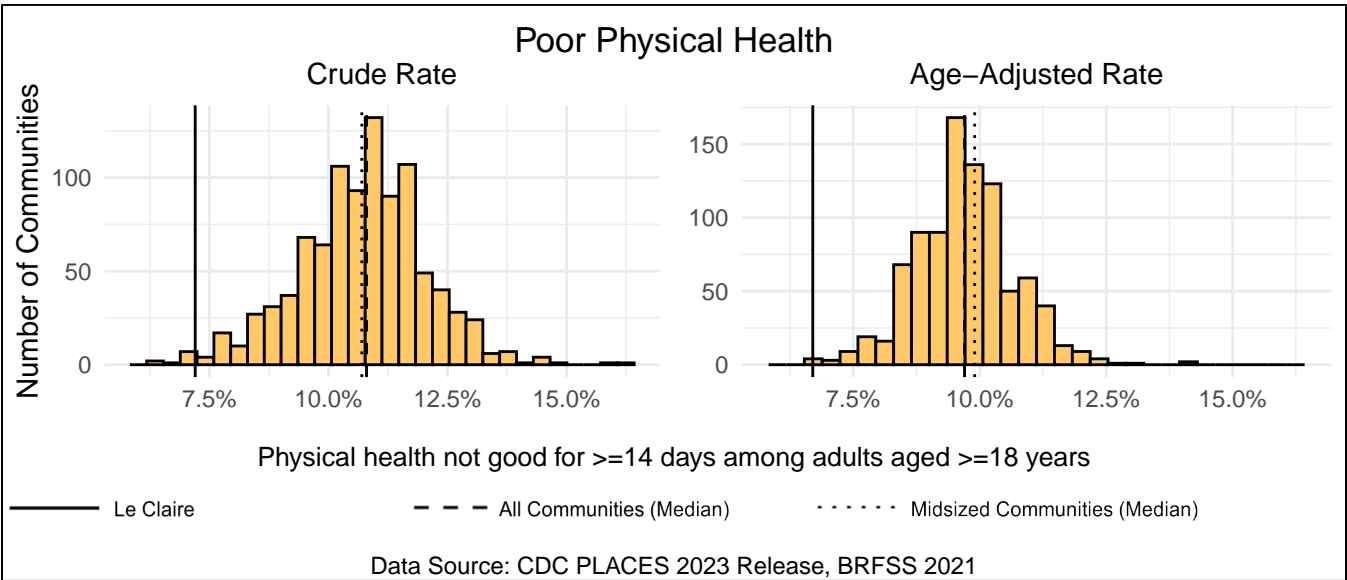

# Poor Physical Health

Le Claire has a crude rate of 7.2% for physical health not good for >=14 days among adults aged >=18 years, which ranks 10th out of 958 Iowa communities (3rd out of 102 midsize communities). The age-adjusted rate for Le Claire is 6.7%, which ranks 3rd out of 905 Iowa communities (1st out of 102 midsize communities).

Crude	12.0%	14.3%	14.4%
Age-Adjusted	12.4%	15.5%	15.5%

# Health Risk Behaviors

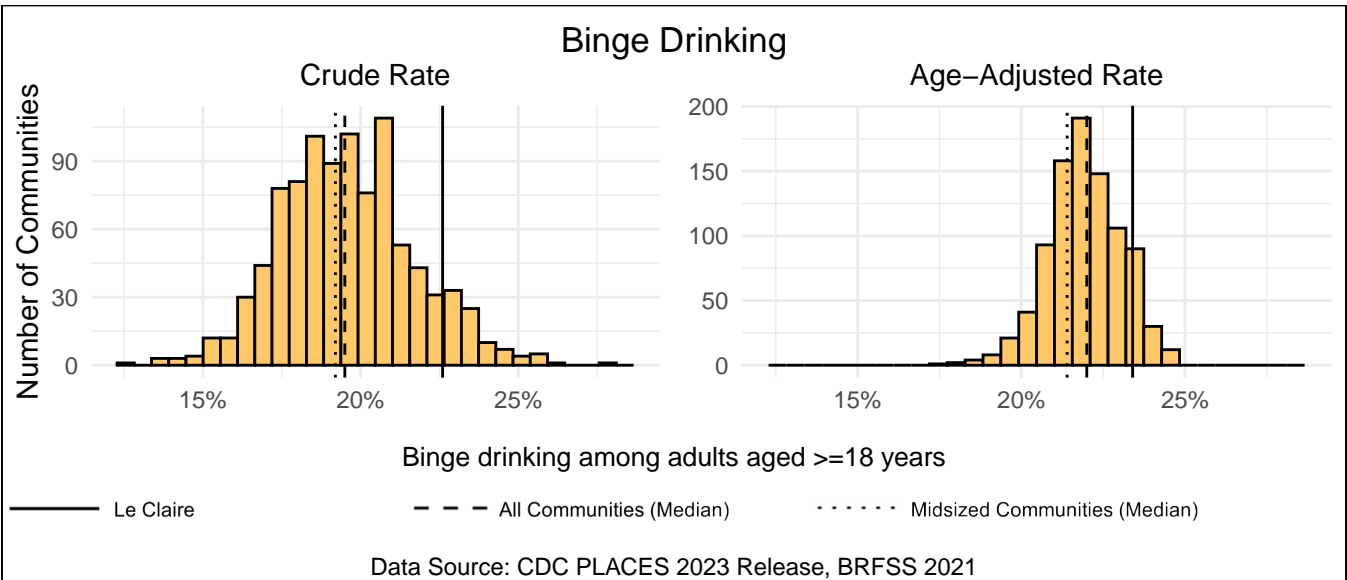

Health risk measures are measures of individual behaviors that can lead to poor health outcomes. These include binge drinking, current smoking, physical inactivity, and getting less than seven hours of nightly sleep. Risk behaviors are the most critical intervention points as they can help save lives and drastically improve health outcomes later in life. Each measure is calculated as the rate of respondents participating in a high level of risk behavior. The exact cutoff points for the behavior depend on the health area. The link below includes more information about each variable.

## Appendix 1: CDC PLACES Data

This report uses a novel dataset from the Centers for Disease Control and Prevention (CDC) called PLACES: Local Data for Better Health. The PLACES dataset uses small area estimation methods to provide estimates of health measures for counties, places, census tracts, and zip code tabulation areas. The estimates are created with a multilevel statistical modeling framework that utilizes CDC's Behavioral Risk Factor Surveillance System (BRFSS), Census population counts, and American Community Survey demographic and socioeconomic data.
