Health in Calhoun County: Overview

Dear Community Members & Stakeholders of Calhoun County,

We are pleased to share the Iowa County Health Snapshot series, a set of reports designed in partnership with Iowa State University's Community Economic Development to assess the overall landscape of health and well-being across Iowa's 99 counties. The following pages include the health snapshot for your county. The snapshot can be used to see how Calhoun County ranks across various health measures compared to the rest of the state and similarly-sized counties. This comparison allows us to identify Calhoun County's strengths and opportunities for growth by leveraging data from the Centers for Disease Control and Prevention PLACES dataset.

The report includes 37 health measures organized topically by general health status, risky behavior, health outcomes, prevention, and disability. We provide a general overview of each health topic, followed by a description of each health measure. Health measure descriptions include crude and age-adjusted rates and a ranking that tells you how your county ranks compared to all Iowa counties and counties of similar size to Calhoun County. Crude rates tell you the raw, un-adjusted percent of the population experiencing the health measure. Age-adjusted rates account for the age distribution present in your county and presents what the rate would be if your county had a standard age distribution. Crude rates can provide a general comparison between counties and age-adjusted rates can give a fairer comparison between counties with different age structures.

Strengths

Take a look at the top strengths of your county! Below are unadjusted and age-adjusted health measures that represent your county's strengths. We recommend using continued investment in these areas to maintain them as strengths, as well as building on them to improve in other health domains.

Crude			Age-Adjusted		
Health Domain	Statewide County Rank	Rural County Rank	Health Domain	Statewide County Rank	Rural County Rank
Depression	9th	7th	Depression	12th	6th
Annual Checkup	10th	8th	Annual Checkup	15th	5th

Mental Health	20th	12th	Mental Health	28th	11th
Cervical Cancer Screening	24th	11th	Current Asthma	29th	12th

Opportunities

Below are health measures that represent potential areas for growth in your county. We recommend increasing investment in these areas to support community health and well-being.

Crude			Age-Adjusted		
Health Domain	Statewide County Rank	Rural County Rank	Health Domain	Statewide County Rank	Rural County Rank
Obesity	83rd	51st	High Blood Pressure	91st	56th
High Blood Pressure	83rd	47th	Obesity	86th	54th

How to Use this Report

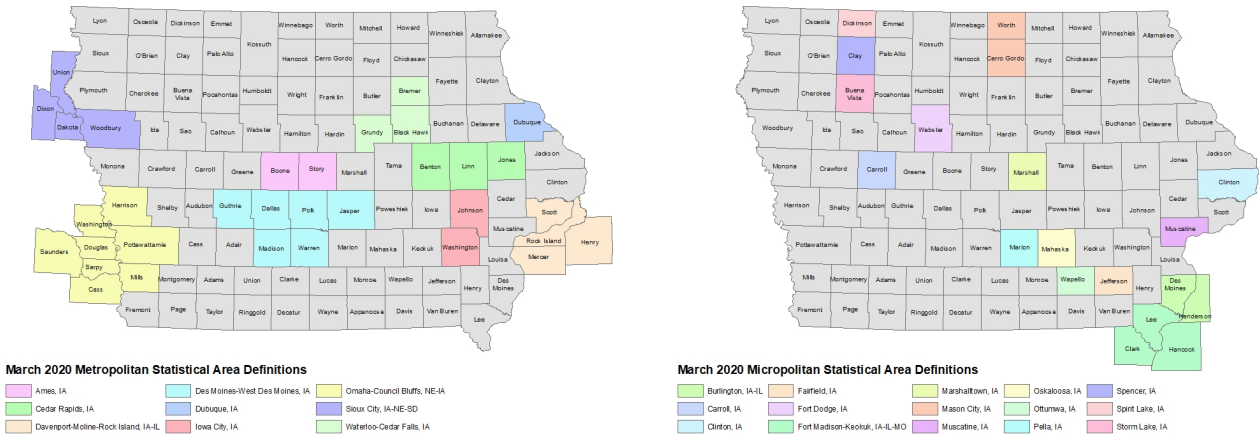

The purpose of the Iowa County Health Snapshot Series is to provide an overview of health in Calhoun County that can be used to help inform health-related interventions and programming. This report contains five sections, including the overall health status of Calhoun County, a review of risky behaviors in the county, and information on various health outcomes, prevention measures, and disability needs. Each section includes an overview of the health domain, a breakdown of its underlying health measures, and data to see how Calhoun County compares to the rest of the state and similarly-sized counties.

With a population of 9,915, Calhoun County’s similarly sized counties are defined as rural counties. In Iowa, rural counties have an average population of 12,547, and there are 63 counties that are considered rural counties. To learn more about the county population classifications used in this report, please see the information below the table as well as Appendix 3.

Group	Population Avg.	Number of Counties
Metropolitan Core	175,797	9
Micropolitan	30,839	15
Metropolitan Non-Core	29,821	12
Rural	12,547	63
Total		99

The counties included in each category above are determined by the United States Office of Management and Budget. Iowa has counties in nine metropolitan statistical areas and 15 micropolitan statistical areas. The counties identified as metropolitan and micropolitan can be found in the link and the maps below. Metropolitan core counties are those counties in metropolitan areas that have the city that defines the metropolitan area (e.g., Des Moines and Polk County for the Des Moines Metropolitan Area). Metropolitan non-core counties are those that fall within the metropolitan area, but do not have the core city of the metropolitan area (e.g., Dallas and Jasper Counties in the Des Moines Metropolitan Area).

Using Story County as an Example

The graphic below is an example of the details included for each health measure. The table in the upper right shows your county's crude and age-adjusted rate estimates alongside their averages across all Iowa counties and similarly-sized counties. The images below show the distribution of the health measure across counties. The vertical lines correspond with the values in the table to show the estimate for the specific county compared to counties across the state. The solid black line in each plot represents the county rate, with the dashed lines indicating the average rate for all Iowa counties and the dotted lines showing the average rate for similarly-sized counties.

The example graphic above displays the poor mental health rate in Story County, Iowa. The left plot shows the crude rate of poor mental health in the county. Crude rates are the raw, un-adjusted percent of the population experiencing the health measure. Notice how the solid black line is closer to the right of the plot than the dashed and dotted lines; this indicates that Story County has a higher crude rate of poor mental health than most counties in the state. However, the age-adjusted rate plot on the right shows the solid line closer to the peak of the distribution and averages for the state and similarly-sized counties, indicating that when accounting for Story County's unique age distribution, Story County's poor mental health rate is not a significant outlier, and is estimated to be lower than the statewide average. Accounting for crude and age-adjusted rates is critical to help inform health interventions as age-adjusted rates can help contextualize the health measure within the population.

Health Status

This section reflects measures for overall health, including general, physical, and mental health. These measures are a valuable way to see a simple summary of the health of a country’s population. The questions to calculate these measures ask respondents to evaluate their health status. General health is evaluated on a 5-point scale where respondents can report their health status as one of “excellent,” “very good,” “good,” “fair,” or “poor,” from which the respondents who answer “fair” or “poor” are included in the measure. Physical and mental health are evaluated as the rate of respondents who say they have had 14 or more days in the last 30 days in which their physical or mental health was not good. The URL below includes more information about each variable.

<https://www.cdc.gov/places/measure-definitions/health-status/index.html>

Poor General Health

Calhoun County has a crude rate of 15.0% for fair or poor self-rated health status among adults aged >= 18 years, which ranks 48th out of 99 Iowa counties (23rd out of 63 similarly-sized counties). The age-adjusted rate for Calhoun County is 13.3%, which ranks 47th out of 99 Iowa counties (24th out of 63 similarly-sized counties).

Measure Type	Calhoun County	All Counties	Similarly-Sized Counties
Crude	15.0%	15.0%	15.5%
Age-Adjusted	13.3%	13.3%	13.5%

Poor Physical Health

Calhoun County has a crude rate of 11.2% for physical health not good for >=14 days among adults aged >=18 years, which ranks 52nd out of 99 Iowa counties (23rd out of 63 similarly-sized counties). The age-adjusted rate for Calhoun County is 10.0%, which ranks 52nd out of 99 Iowa counties (27th out of 63 similarly-sized counties).

Measure Type	Calhoun County	All Counties	Similarly-Sized Counties
Crude	11.2%	11.1%	11.4%
Age-Adjusted	10.0%	9.9%	10.1%

Poor Mental Health

Calhoun County has a crude rate of 13.7% for mental health not good for >=14 days among adults aged >=18 years, which ranks 20th out of 99 Iowa counties (12th out of 63 similarly-sized counties). The age-adjusted rate for Calhoun County is 15.2%, which ranks 28th out of 99 Iowa counties (11th out of 63 similarly-sized counties).

Measure Type	Calhoun County	All Counties	Similarly-Sized Counties
Crude	13.7%	14.1%	14.1%
Age-Adjusted	15.2%	15.5%	15.7%

Health Risk Behaviors

Health risk measures are measures of individual behaviors that can lead to poor health outcomes. These include binge drinking, current smoking, physical inactivity, and getting less than seven hours of nightly sleep. Risk behaviors are the most critical intervention points as they can help save lives and drastically improve health outcomes later in life. Each measure is calculated as the rate of respondents participating in a high level of risk behavior. The exact cutoff points for the behavior depend on the health area. The link below includes more information about each variable.

<https://www.cdc.gov/places/measure-definitions/unhealthy-behaviors/index.html>

Binge Drinking

Calhoun County has a crude rate of 18.6% for binge drinking among adults aged ≥ 18 years, which ranks 51st out of 99 Iowa counties (40th out of 63 similarly-sized counties). The age-adjusted rate for Calhoun County is 21.9%, which ranks 70th out of 99 Iowa counties (50th out of 63 similarly-sized counties).

Measure Type	Calhoun County	All Counties	Similarly-Sized Counties
Crude	18.6%	18.5%	18.1%
Age-Adjusted	21.9%	21.3%	21.3%

Current Smoking

Calhoun County has a crude rate of 16.6% for current smoking among adults aged ≥ 18 years, which ranks 44th out of 99 Iowa counties (21st out of 63 similarly-sized counties). The age-adjusted rate for Calhoun County is 17.9%, which ranks 51st out of 99 Iowa counties (25th out of 63 similarly-sized counties).

Measure Type	Calhoun County	All Counties	Similarly-Sized Counties
Crude	16.6%	16.7%	16.9%
Age-Adjusted	17.9%	17.8%	18.1%

Physical Inactivity

Calhoun County has a crude rate of 27.2% for no leisure-time physical activity among adults aged ≥ 18 years, which ranks 55th out of 99 Iowa counties (29th out of 63 similarly-sized counties). The age-adjusted rate for Calhoun County is 25.2%, which ranks 51st out of 99 Iowa counties (29th out of 63 similarly-sized counties).

Measure Type	Calhoun County	All Counties	Similarly-Sized Counties
Crude	27.2%	26.8%	27.3%
Age-Adjusted	25.2%	25.1%	25.4%

Sleep <7 hours

Calhoun County has a crude rate of 29.7% for sleeping less than 7 hours among adults aged ≥ 18 years, which ranks 36th out of 99 Iowa counties (23rd out of 63 similarly-sized counties). The age-adjusted rate for Calhoun County is 31.2%, which ranks 39th out of 99 Iowa counties (24th out of 63 similarly-sized counties).

Measure Type	Calhoun County	All Counties	Similarly-Sized Counties
Crude	29.7%	30.0%	30.0%
Age-Adjusted	31.2%	31.4%	31.5%

Health Outcomes

This section includes measures about specific health outcomes such as chronic illness, mental health conditions, and risk factors for future disease. Health outcome measures include but are not limited to arthritis, high blood pressure, cancer, depression, and obesity. Each measure is the percentage of respondents reporting receiving the diagnosis by a doctor, nurse, or other health professional. The link below includes more information about each variable.

<https://www.cdc.gov/places/measure-definitions/health-outcomes/index.html>

Arthritis

Calhoun County has a crude rate of 29.7% for arthritis among adults aged ≥ 18 years, which ranks 68th out of 99 Iowa counties (36th out of 63 similarly-sized counties). The age-adjusted rate for Calhoun County is 23.5%, which ranks 68th out of 99 Iowa counties (43rd out of 63 similarly-sized counties).

Measure Type	Calhoun County	All Counties	Similarly-Sized Counties

Prevention

Preventive measures are another practical intervention point for public health professionals as they allow for the early detection of health conditions and improve overall treatment efficacy. This section includes a review of your county’s prevention measures, including preventive screenings and doctor visits. Besides the measure for lack of health insurance, all measures in this section are positive, where a higher rate is a strength for your county. The link below includes more information about each variable.

Appendix 1: CDC PLACES Data

This report uses a novel dataset from the Centers for Disease Control and Prevention (CDC) called PLACES: Local Data for Better Health. The PLACES dataset uses small area estimation methods to provide estimates of health measures for counties, places, census tracts, and zip code tabulation areas. The estimates are created with a multilevel statistical modeling framework that utilizes CDC's Behavioral Risk Factor Surveillance System (BRFSS), Census population counts, and American Community Survey demographic and socioeconomic data.
